Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/574,997	Applicant(s) BACHE, JOHN C.	
	Examiner Thomas M. Lithgow	Art Unit 1797	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 6-7 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Wilson (US 4759854). Wilson '854 discloses a vortex grit trap having a rotary disk as a "divider" which defines an annulus through which grit passes to the collection zone. Vertical tube will periodically discharge gas in the collection zone which scours the grit to wash out any trapped organics [col. 4, line 1+]. As the bubbles will inherently rise up and flow through the annulus gap opposite to the flow of grit, the claims are anticipated by Wilson '854. The process is considered "continuous" during the entire scouring cycle.

3. Claims 1-4, 6 and 8-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Weis (US 3941698). Weis '698 discloses a

vortex grit trap having a propeller 38 as a "divider". There is defined an annulus 72 by a tank liner plate 68 which leads to a collection zone. Air distribution pipes are located in the collection zone for causing a flow of bubbles which will rise counter to the flow of grit into the collection zone through the annulus.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wilson '854 as applied to claim 1 above, and further in view of Schulze (US 3129173). It is known that a rotary flow of solids can contribute to direct erosion of the vessel in which the rotary motion of the solids occurs as taught by Schulze '173. Schulze '173 employs a liner to prevent such erosion upon the vessel and to do so in Wilson '854 would have been obvious to one of ordinary skill in the art.

Allowable Subject Matter

6. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
